

UI/UX Design Team Assignment Document

Project Overview

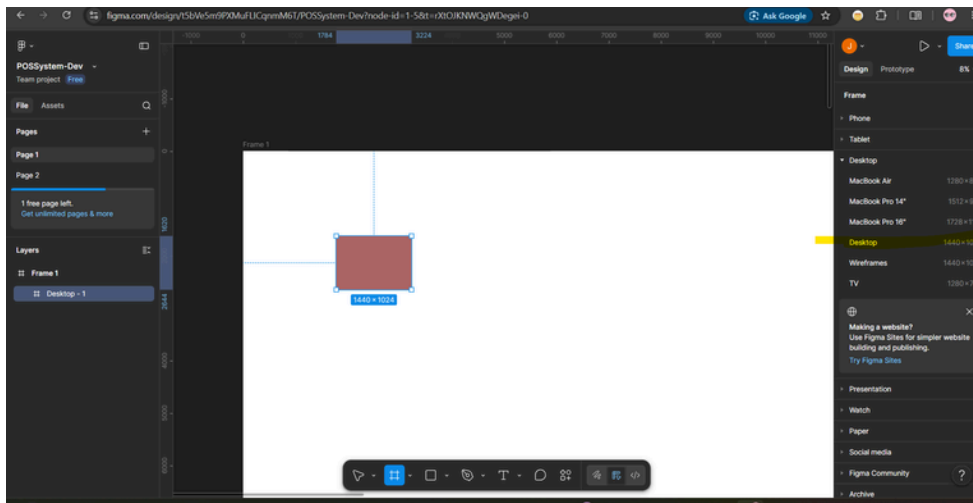

Each team member is responsible for designing a complete module of the system in **FIGMA**. The assigned module must include:

- User Flow
- High-Fidelity UI Screens
- Responsive Design (Desktop, Tablet, Mobile) Component
- Prototype & Interactions

UI/UX Design Assignment Instructions (Figma)

1. Default Screen Setup

- All designs must be created in Desktop view (default screen size) as shown in the reference screenshot.
- Do not design mobile or tablet versions unless specifically assigned.

2. Screen Design Responsibility

- Each team member is responsible for designing the screens inside their assigned module/frame.
- The highlighted frame/section inside the design must be fully designed by the assigned member.
- Ensure consistency across all screens within the same module.

3. Naming Convention (VERY IMPORTANT)

- Every screen must be renamed using the following format:

Format:

<ModuleName>_<ScreenName>_<YourName>

Example:

Authentication Module_Login_Jayani

4. Design Rules

- Keep UI consistent with the overall system theme.
- Use proper spacing, alignment, and typography hierarchy.
- Make sure all components are reusable and structured properly in Figma.
- Avoid mixing other team members' screen areas.

5. Team Coordination

- Each member should clearly identify their assigned module before starting.
- No overlapping work inside other members' frames.
- Final submission must include properly named screens only.
